

Asha Rao

asha.rao@example.com | github.com/asharao | Bangalore, India

SUMMARY

Software engineering intern specializing in Python backend architecture and stateful AI agents.

TECHNICAL SKILLS

Languages: Python, SQL

Backend & Frameworks: FastAPI, AsyncIO, PostgreSQL, Redis, SQLAlchemy, Celery

AI & Agentic Systems: LangGraph, LangChain, Multi-Agent, Tool Calling, Vector Search, ChromaDB

Cloud & DevOps: Docker, GCP, CI/CD, Pytest

PROJECTS

Autonomous Customer Support Agent (Python, FastAPI, LangGraph, Redis, GCP)

- Architected a stateful multi-agent system using LangGraph and tool calling for incident routing.
- Integrated ChromaDB vector store with hybrid retrieval and evaluation pipelines.
- Engineered async FastAPI backend with PostgreSQL persistence and Redis distributed caching.
- Deployed containerized services on GCP Cloud Run with automated Pytest CI/CD workflows.
